Day Two: Gemba Benchmark Tours

Thursday, 28 November 2019

The second day is traditionally spent on visiting companies - GEMBA WALK.

In Japanese Gemba means "real place" understood as the place where added value is generated. The workshops are aimed at teaching the Congress participants and honing their skills in the most practical way. The participants will also enjoy an opportunity to exchange their experience with the best practitioners. It is the Congress's tradition to visit production plants that have a strong track record of KAIZEN™ culture and tools implementation. During our visits we will be looking for evidence to support the claim that the organisations based on sound principles of KAIZEN™ culture are able to succeed now and in the future. Congress participants can choose - by their preferences - a visit in companies representing various industries where they will see the KAIZEN™ culture from different perspective, observe accompanying processes and tools that ensure high quality, profit and Clients satisfaction.

Agenda:

1. presentation of business and processes
2. visit to the shop floor, going through processes
3. searching for MUDA and areas for improvement
4. result presentation
5. summary and discussion

The companies hosting Gemba Walks reserve their right to admit a participant representing a competitor company

Day Three: Gemba Workshop Day

Friday, 29 November 2019

The Third Day is dedicated to practical thematic workshops in the production plants.

The workshops are aimed to show the participants the application of selected KAIZEN™ tools in practice and the way they are used in the host factory. Small, 12-15 member groups facilitate sharing experience both with the hosts and with each other.

The host factories – based in Wrocław vicinities – are benchmark organisations for implementing KAIZEN™ culture and tools. Congress participants can choose – by their preferences – a visit in one of the host factories where they will see the KAIZEN™ culture at close range and get inspired by its processes and tools. Additionally they will be invited to take part in an interesting thematic workshop.

Agenda:

1. presentation of business and processes
2. workshop
3. visit on the shop floor, going through processes
4. summary and discussion
